Art Unit: 1724

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 4, 5, 9 and 10, drawn to a fuel cell cooling system and method employing a filter comprising ruthenium supported on activated carbon, classified in class 210, subclass 679.
- II. Claims 6-8, 12 and 13, drawn to a fuel cell cooling system and method employing an inert-gas injector, classified in class 210, subclass 805.

The inventions are independent and distinct from one another because the invention of Group I does not require the inert-gas injector of Group II, and the invention of Group II does not require the filter of Group I.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to I. Cintins whose telephone number is 571-272-1155.
